Potential for Website Cost Reporting

Pease, CPAs has a staff dedicated to preparing Medicaid and Medicare Cost Reports for Healthcare Providers. Most healthcare facilities are required to prepare Cost Reports for Medicaid and Medicare. These reports are filed with the respective government agency or a Medicare Administrative Contractor (MAC) and can impact the reimbursement rates from the agency both current and in the future. Filing the reports timely can frequently be a problem as they are due when the books have closed and the inhouse staff is preparing for Audits/Reviews/Tax filings and still completing their regular position's duties.

Pease can complete that filing with client data requests on key data like census, trial balance, depreciation schedules, owner information, staffing levels, RUGS (Resource Utilization Group), reimbursed information and Bad Debts. We work with the client in the filing and try to maximize the reimbursement. We can also offer consulting services to assist your department in preparing the information required to file.

The Staff at Pease is experienced and up to date with the new reporting rules like the Covid-19 rules for 2020. Your reports will be filed accurately and timely while your in-house staff can concentrate on the daily operations.

If you are interested in learning more about Pease CPAs' Cost Reporting Services and how we can assist you in preparing or advising on the Cost Reporting packages required by Medicaid or Medicare, please contact Geri Weis, CPA, Senior Accounting Associate, Accounting and Tax Group at gweis@peasecpa.com.
